Hi,

I hope you actually do not care about my language sentence structure, because i'm from Germany. I toxified your machine with a virus and now have your private data out of your os.

It previously was set up on an adult webpage and after that you've picked the movie, clicked on it, my application immediately got into your os.

Afterward, your web-cam recorded you playing with your stuff, furthermore i caught a movie that you have viewed.

After a while in addition, it pulled out all of your device contacts. If you happen to want me to erase your everything i currently have - give me 670 euros in btc its a cryptocurrency. It's my btc wallet transfer address : 17wzUKzT7LRvizfHWh9vC7eJfMAuh5pUGD

At this point you will have 26hrs. to make up your mind When i will get the deal i will get rid of this evidence and every little thing thoroughly. In any other case, you should be certain this evidence will be forwarded to all of your friends.
